Announcing 2019 Spring Summit Keynote

Keren Elazari, a former hacker turned cyber security expert, is an internationally celebrated speaker, researcher and author on all matters of cyber security. Her 2014 TED talk, viewed by millions, helped shape the global conversation about the role of hackers and the evolution of cyber security in the information age.

IMAGINE THIS: Your company discovers company proprietary information for sale on the dark web. Not too far fetched, is it? Here is how **H-ISAC Shared Services can help:**

Shared Services

IP & Digital Risk
Monitoring

With DigitalStakeout, in this scenario, the analyst acts immediately alerting development and production teams to the information leak.

Recognizing the negative financial impact of company information on the dark web, a company can identify the source of the leak and start the process to remove the highly sensitive and confidential information.

DigitalStakeout will:

- Obtain complete visibility into your organization's expanding and persistently changing digital footprint; the activities, actions and communications that can be passively or actively collected by third parties when using digital devices & services.
- Enhance your organization's ability to protect confidential data, organizational reputation and customer experience.
- Adjust and adapt to breaking situations analysts must triage and mitigate to maintain organizational resiliency and protect its reputation.

Find more information on Shared Services at <https://h-isac.org/shared-services/#IP>

H-ISAC WORKING GROUP Spotlight

-Global Privacy Working Group-

This working group transitioned from the General Data Protection Regulation (GDPR) Working Group. Once GDPR became enforced on May 25, 2018, feedback from members was to transition the group to focus on emerging global privacy legislation and guidance. This led to the forming of the Global Privacy Working Group! There are many regulations coming forward globally. This group will share actionable information, ideas, best practices, and guidance on emerging international healthcare policy, legislation, standards and directives, and trends regarding healthcare provider purchasing requirements. The first working group meeting was held on March 1, 2019.
