H-ISAC FALL “Never Stand Alone” SUMMIT

Get the Scoop! Keynote by Krebs

H-ISAC is proud to announce Brian Krebs as the Keynote speaker at our Never Stand Alone Summit this November. Krebs is best known for his insights into current, as well as future, cybertrends.

Keynote at the Fall Summit will be on Wednesday, November 28, immediately following the 8:30 am Opening Remarks.

Brian Krebs is an independent investigative reporter who writes about cybercrime at the award-winning website KrebsOnSecurity.com.

Formerly with The Washington Post (1995 to 2009), Krebs is probably best known for breaking stories on high-profile data breaches, including those that hit Target, Home Depot, Michaels and Ashley Madison.

A frequent interviewee and public speaker, Krebs has been profiled by 60 Minutes, The New York Times, Poynter.org and Business Week. Krebs’s book, Spam Nation: The Inside Story of Organized Cybercrime - From Global Epidemic to Your Front Door – is now a New York Times bestseller.

In January 2015, the National Press Foundation announced it was awarding Krebs its Chairman's Citation, an award designed to "recognize individuals whose accomplishments fall outside the traditional categories of excellence." In October 2014, the Association of Certified Fraud Examiners gave Krebs the "Guardian Award," an honor given annually to a journalist "whose determination, perseverance and commitment to the truth have contributed significantly to the fight against fraud."

Bring your Spouse/Partner to the Fall Summit Register them for this authentic tour event

A spectacular day touring the oldest city of Texas has been planned for them! The group will discover San Antonio’s world-renowned urban waterway by river taxi. Next, they will experience the sights and flavors of old Mexico at Historic Market Square where they will have the opportunity to explore over 100 locally owned shops and stalls, and find authentic Talavera pottery, exotic curios and handcrafted works of art. The experience concludes with gourmet Mexican cuisine at Mi Tierra, a landmark Mexican café & bakery.

Your spouse/partner may register for this event here:

ICS Security Workshop

Operation Technology vs. Information Technology

The H-ISAC / Booz Allen Hamilton ICS Security Workshop was held on Wednesday, September 26, 2018 in Cork, Ireland. There were about 26 individuals representing 12 different companies that participated in the workshop.

The group had great discussions throughout the workshop on various topics around ICS Security. Some of these included discussions around the differences among IT and OT security; current threats; security gaps; procurement; patching; education, training and awareness; and many other topics.

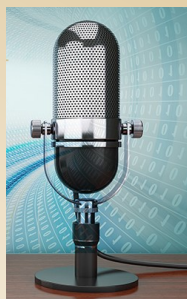

There were also plenty of networking opportunities during dinner both the night before the workshop as well as the night following the workshop. The group thought the workshop was a great opportunity to come together to discuss some of the challenges with ICS security. In response to the feedback from this workshop, H-ISAC is planning future ICS Security workshops in 2019.

Mark Your Calendars For these Upcoming Events:

H-ISAC Radio

October 29—Software Bill of Materials

November 28—IAM & Portable Identity
Live in the Lobby of the Fall Summit
Come listen live and participate.

Health Sector Coordinating Council Joint Cybersecurity Working Group ALL-HANDS Meeting

October 9th in Nashville, Tennessee
Followed by October 10 - 11th exercise

Tabletop exercise to test ability to share information and coordinate response during a blended event of a flu pandemic and a cascading ransomware attack on hospital systems.

Healthcare Cybersecurity Security Seminar and Workshop

Hosted by Amgen
