Service Update: CYBERFIT Shared Risk Assessments

An Interview with Brenda Ferraro, newly appointed Senior Director of Networks and **Third Party Risk Assessment** services at Prevalent.

"How does your relationship with NH-ISAC benefit your approach to motivating the health sector in the area of Third Party Risk?"

Coming from a former NH-ISAC member organization, I had the opportunity to build relationships with the members over the years. I am fortunate to continue as the co-chair of the NH-ISAC Third Party Risk Governance workgroup, along with Peter Subar from J&J. Together we are leading the workgroup to bring forward the Third Party Risk Governance Summit (TPRG) in concordance with the upcoming NH-ISAC Fall Summit and will publish a white paper to share thought leadership on third party risk standards. With NH-ISAC relationships I've built over the years, the members have shown to be a strong family of practitioners all motivated to share information in support of an economic approach to health sector Third Party Risk.

CYBERFIT Vendor Spotlight:

Prevalent Wins Gold IT World Award for Best Vendor Risk Management

WARREN, NJ (August 1, 2017) – Prevalent, Inc., the leader in third-party risk management, announced today that *Network Products Guide*, a leading technology research and advisory guide, has named Prevalent's Synapse Exchange™ the Gold Winner for *Best Vendor Risk Management* in the 12th Annual 2017 IT World Awards®.

"Why should NH-ISAC members take advantage of this opportunity?"

CYBERFIT's *Shared Risk Assessment* component enables members to focus on the economic approach to Third Party Risk Assessment by sharing assessments using the NH-ISAC CYBERFIT assessment repository (powered by Prevalent). Prevalent has built its software solution to remove delay and waste in the workflow and handoffs of content between the assessor and the assessed party. When third party assessments are shared and published in the repository, the membership has a greater opportunity to experience an increased value add realization. The cost savings of completing a single assessment and sharing with many allows the members to refocus their funding to solving the problems of tomorrow. Prevalent is targeting 1000 assessments by end of year and we are looking for all NH-ISAC members to take advantage of completing an assessment questionnaire for hands-on experience, awareness and value add benefit for the entire NH-ISAC community.

Security Operations Services

Informational Webinar

On September 6, 2017, SecureWorks and Amgen jointly presented a webinar on CYBERFIT *Security Operations Services* to NH-ISAC members.

SecureWorks opened the discussion with highlights of current threats including ransomware, observing that 88% of ransomware attacks have occurred in health care organizations. Suggestions were made on how to assess a company's security posture, and when to use the different CYBERFIT offerings of vulnerability assessment, penetration testing, web application testing, and incident response.

Amgen followed with an overview of security services and the Gartner magic quadrant's high-level view of market leaders such as SecureWorks. It was also recommended to identify integration between NH-ISAC's CYBERFIT offerings and other member services that may be useful to an organization, such as threat intelligence information.

The webinar will be accessible to NH-ISAC members in the member portal.

Benchmarking Services

Improved Benchmarking Questionnaire

The CYBERFIT assessment questionnaire is now easier to complete with better insights for our members! The CYBERFIT working group recently conducted a survey to gather feedback on the experience of our members with this tool. You told us what you wanted, and we listened! The response that we received helped us identify some key changes to make it faster to complete and to make the output more helpful to you in building your cybersecurity program. After updating the questionnaire, we surveyed members again with the new content and received very positive initial feedback. The updated questionnaire should be available to all of our members soon, and we look forward to hearing your comments and suggestions for future versions.

Legal and Regulatory

Hacking Healthcare, A weekly legal and regulatory news blog that delves into current relevant policy information now goes out to members every Tuesday in a TLP amber version via the member Listserver. Ben Flatgard will also be writing a monthly Legal and Regulatory article for NH-ISAC members.

NH-ISAC Fall Summit: CYBER RODEO November 28-30 and Upcoming Summits

Go to https://nhisac.org/events/cyber-rodeo/ to register and reserve your spot for special events.

Keynote speaker Dr. Zubin Damania, MD, aka ZDogg Implemented Turntable Health, an innovative model of health care delivery that promotes wellness at both the individual and community level. "Health 3.0, promotes personal and system-level transformation through storytelling, humor and music."

Upcoming NH-ISAC Summits

2018 Spring Summit
May 14 – 17, 2018. Ponte Vedra Beach, FL

2018 Fall Summit
November 26 – 29, 2018. San Antonio, TX

2019 Spring Summit
May 13 – 16, 2019. Ponte Vedra Beach, FL

2019 Fall Summit
December 2 – 5, 2019. San Diego, CA

2020 Fall Summit
November 30 – December 3, 2020. Phoenix, AZ

Our Spring Summit was listed by InfoSec in the top 5 Cybersecurity Healthcare Conferences in the world https://infosec-conferences.com/events/healthcare/.
